

## Load Data

The **Load Data**, imports the raw data from the Taylor Park Reservoir Proposed Operation page. **Load Data** is the first step to using the program.

1. Open the Taylor River PDF that the government provided, it should open in a browser.
2. Navigate to the Proposed Operations page, lately the information is on page 4.
3. Using the mouse, select the data starting with the Proposed Operations and finishing with the Maximum Content and then select the CTRL+C keys to copy the data.

- If this is the first time the report data has been loaded, save the report data by selecting the Save menu option. The name of the file will automatically be generated using the information from the report. The name can be changed, but it is best to use the default name for consistency. The saved data will be based on the true data from the report, later the data can be changed and saved using a different name. The report will be saved to the Download folder. Once the files are saved, the saved files will be used to load the data. There is no need to Cut and Paste the PDF Files.

8. The saved files can be copied to a more meaning folder. The saved reports are used with the **File Import and Analytics Menus**.
